

# Winter In My Country

## **Projenin Amacı**

The aim of this international project is to show what winter in different countries look like. Partner schools taking part in the project are asked to take photos of their hometown in winter (photos can show wointer landcapes / people doing some winter activities etc.)Each photo should include a short description of what is in the picture. Partner schools send a few photos to EACH school taking part in the project so that each school can create a school gallery (also a virtual gallery on Twin Space). At the final stage of the project we can make a video call to get to know each other better.

## **Hedefler**

The aim of the project is:  
to show what winter in variuous countries looks like  
practice English  
show intercultural differences  
raise childrens' creativity  
make new acquaintances

## **Çalışma Süreci**

Schools (students) are going to take photos and coordinators send them to EACH school. By the end of February each school should receive photos (the latest date to send photos by the project coordinators is 15th February so that each school gets photos on time). As soon as the school receives photos ,makes a school gallery. At the beginning of March we make a virtual gallery on Twin Space and at the end of March we can make a video call. School coordinators remain in constant contact (by email / etwinning messages ). Students are responsible for taking photos, describing them, making a school gallery, discussion with a teacher on environmental/geographical differences, taking part in video chat.

## **Beklenen Sonuçlar**

photo gallery for a school society

virtual gallery on TwinSpace when the project is finished
